## Rug maintenance/cleaning

Spills: Clean immediately after a spill. Spot clean the rug using a non-bleach detergent and water. Soda water is even better than using water.

General cleaning: Overall cleaning is necessary every so often. However DO NOT dry clean the rugs. Take them to the cleaners (preferably a rug cleaner) and get them "Professionally Cleaned". In Dry Cleaning they put the rug in the dry cleaning machine with dry cleaning fluid which is damaging to the rug. Sometimes people put a small size rug in the washing machine. That is NOT recommended. Unlike clothes, rugs cannot be ironed back to a crisp flat shape and they get a little "bent" after being in the washing machine.
